

RivetKing®

A single source for semi tubular rivets and automated setting solutions

RivetKing® is a world-class distributor, manufacturer and importer of solid and semi tubular rivets, as well as other permanent fastening products. Our in-depth knowledge of permanent fasteners and their delivery systems is combined with an extensive manufacturing network – enabling us to make products in virtually any standard or custom head style, length, material and finish for:

- Blind rivets
- Speed rivets
- Rivet nuts
- Solid rivets
- Semi tubular rivets
- Split rivets
- Shoulder rivets
- Collar rivets

RivetKing offers the deepest inventory of semi tubular rivets and the ability to integrate its automated setting machinery to meet every manufacturing need.

Semi Tubular Rivets

When you work with RivetKing, you have access to the industry's largest inventory of solid and semi tubular rivets, ranging from off-the-shelf to standard to custom designs.

Our semi tubular oval and truss head rivets, shoulder rivets and solid rivets are ideal for fastening pre-punched or pre-drilled pieces of metal, wood, plastic, ceramic, leather or composition materials together – providing a strong, permanent bond for a wide range of applications such as:

- Outdoor and folding furniture
- Circuit breakers
- Satellite dishes
- Baby carriages
- Car seats
- Hospital beds
- And more

For other specialty applications, RivetKing also offers semi tubular deep-hole, metal piercing, electrical contact and split or bifurcated rivets.

Automated Semi Tubular Rivet Setting Solutions

With a far-reaching network, RivetKing also gives you seamless access to the industry's leading automated semi tubular rivet setting solutions. Our long-standing relationship with Edward Segal, Inc. (www.edwardsegalinc.com), for example, puts two knowledgeable experts on your side – giving you full technical support and application assistance whenever you need it for both rivets and machinery solutions. That means in addition to a variety of existing handheld, bench mounted and freestanding machines, RivetKing and Edward Segal, Inc. can work with you to design and build custom engineered, automated assembly systems for specific and/or high volume application needs.
